

How to do your own

branch

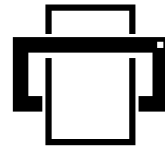

1— This document contains 14 pages with cards of the Branch game.

2— To print your game at home, choose the sided version and cut the cards as marked

CUTTING TIPS

- Do not cut the paper all the way (side to side), to avoid losing the cutting line reference.
- If the printer doesn't print the cutting line, take the limit of the card inside of the artwork as the cut-off limit! ;-)

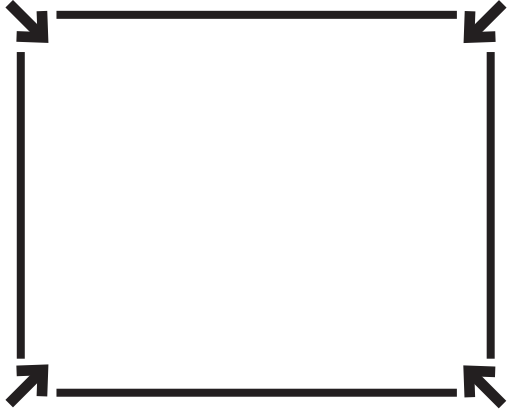

3— If you want better quality cards, we recommend that you look for a print shop and ask for a laser printing PB-sided and choose a coated paper with a weight of 180 or greater.

4— When it's time to play we suggest that hand the cards inside a A6 size envelope.

starting point

starting point

What do you feel like you have to do in this life?

What would you never kill in yourself?

When you really look in the mirror, what do you see?

What are you famous for?

Tell me about something memorable that happened to you when you were wasted.
